Examine a local Medical Reserve Corp Organization

**Integrate lessons
Learned During 2004**

**Extrapolate Processes to
Incorporate Statewide MRC Assets**

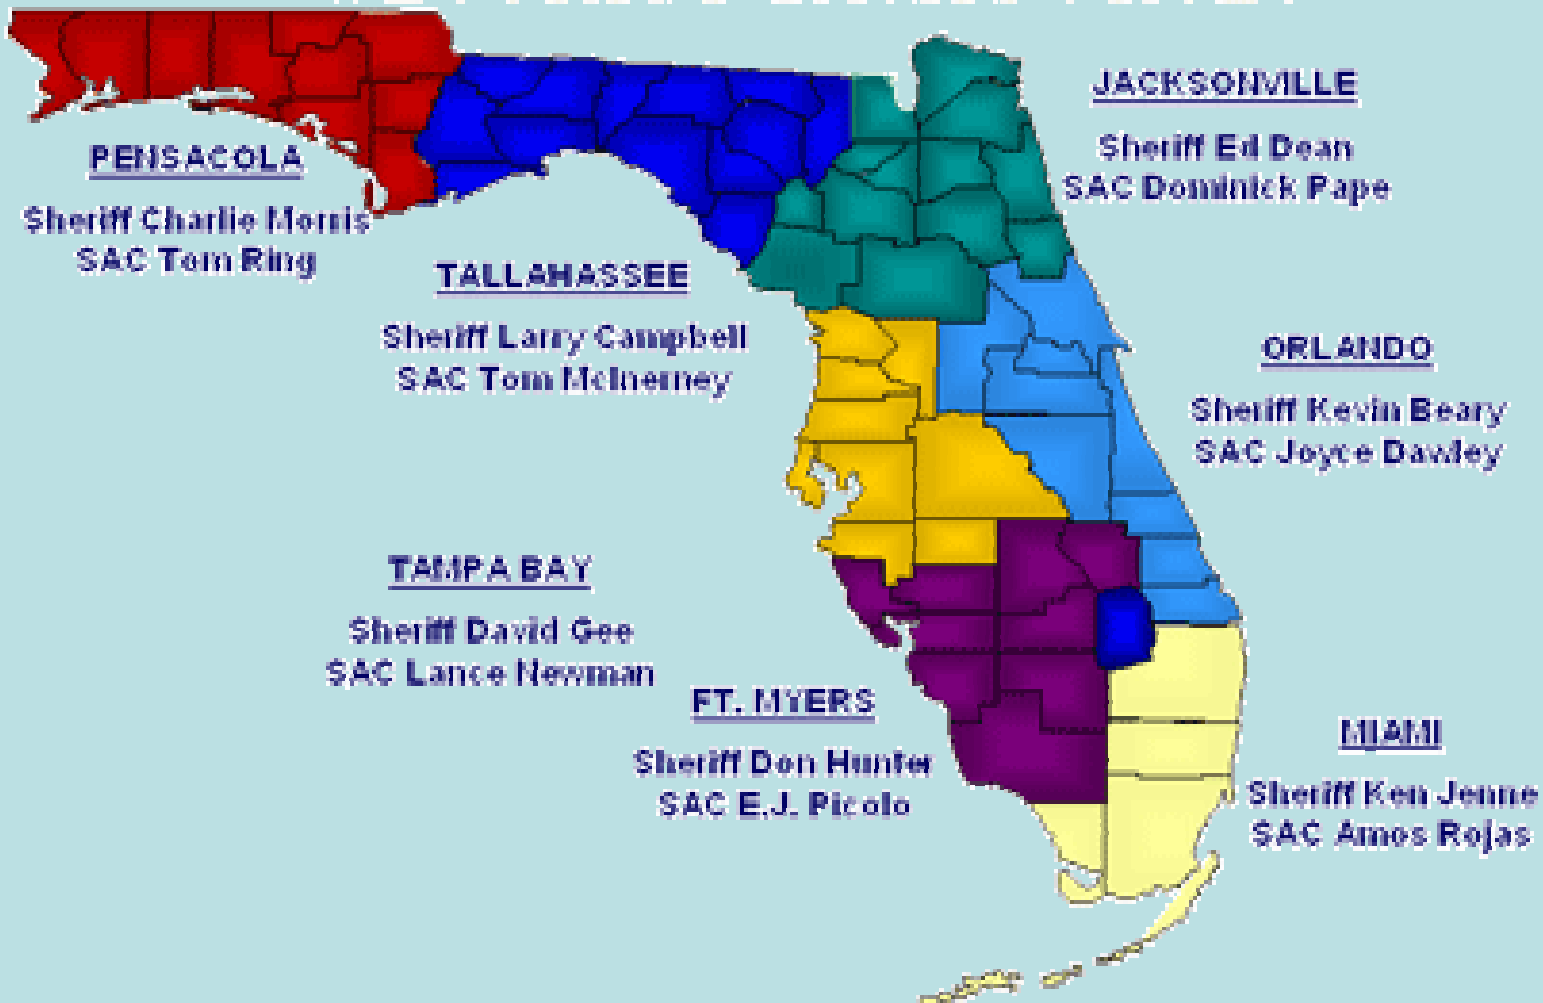

All Hazard Approach

FLORIDA'S REGIONAL DOMESTIC SECURITY TASK FORCES

The Florida Department of Health Strategy

- Informed, alert and empowered workforce and public

- Protected health care community

- Rapid detection, investigation And response to disease outbreaks

The Florida Department of Health Strategy

- **Efficient health care communications system that is interoperable with other responders in Florida**
- **Health care system capable of responding To events resulting in mass casualties**
- **Integrated all-hazards planning, assessment and response system**

Domestic Security Strategy

Strengthen our domestic security prevention, preparedness, and response capabilities through interdisciplinary and interagency consensus and commitment to build and rely on a strong Regional Mutual Aid Response Capability.

Domestic Security Strategy

- **PREVENT**, preempt and deter acts of terrorism
- **PREPARE** for terrorism response missions
- **PROTECT** Florida's citizens, visitors and critical infrastructure

Domestic Security Strategy

- **RESPOND** in an immediate, effective and coordinated manner focusing on victims of the attack

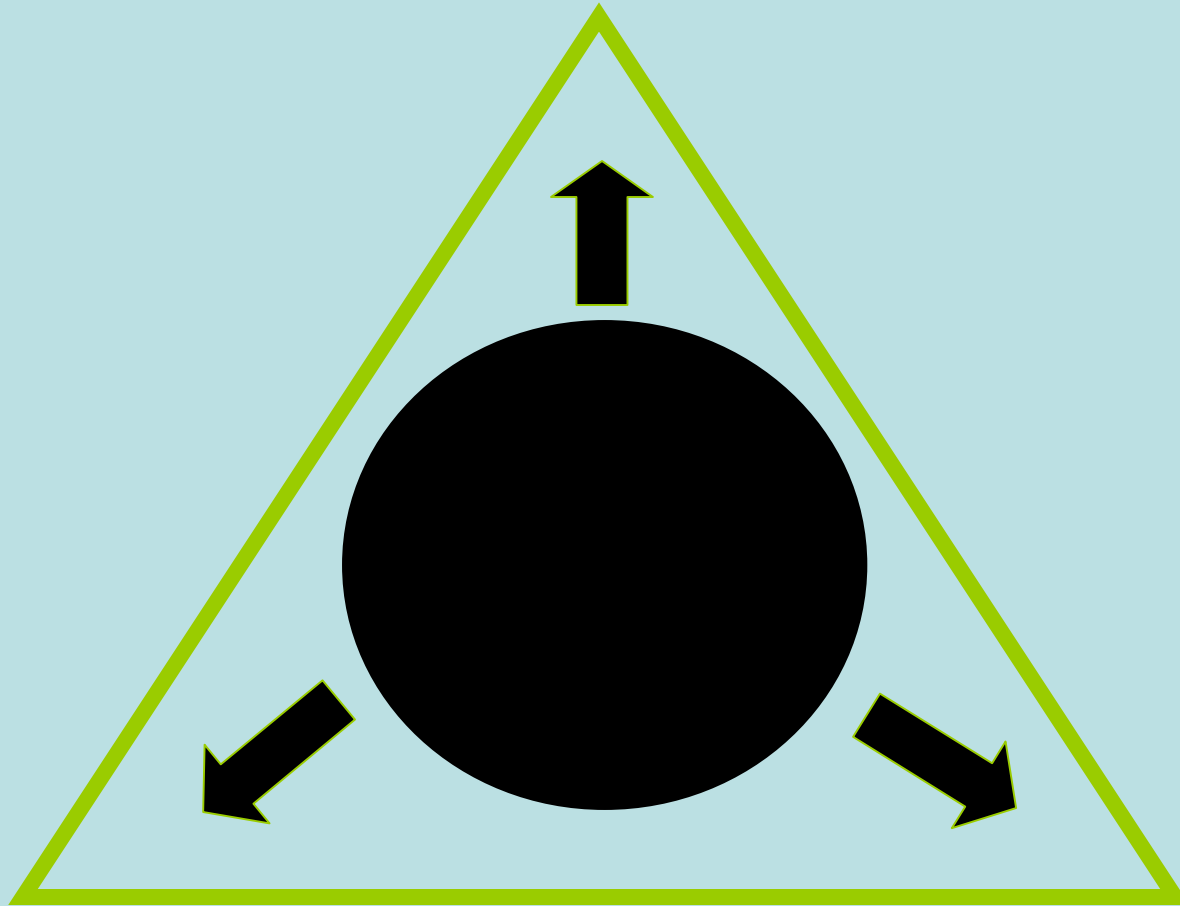

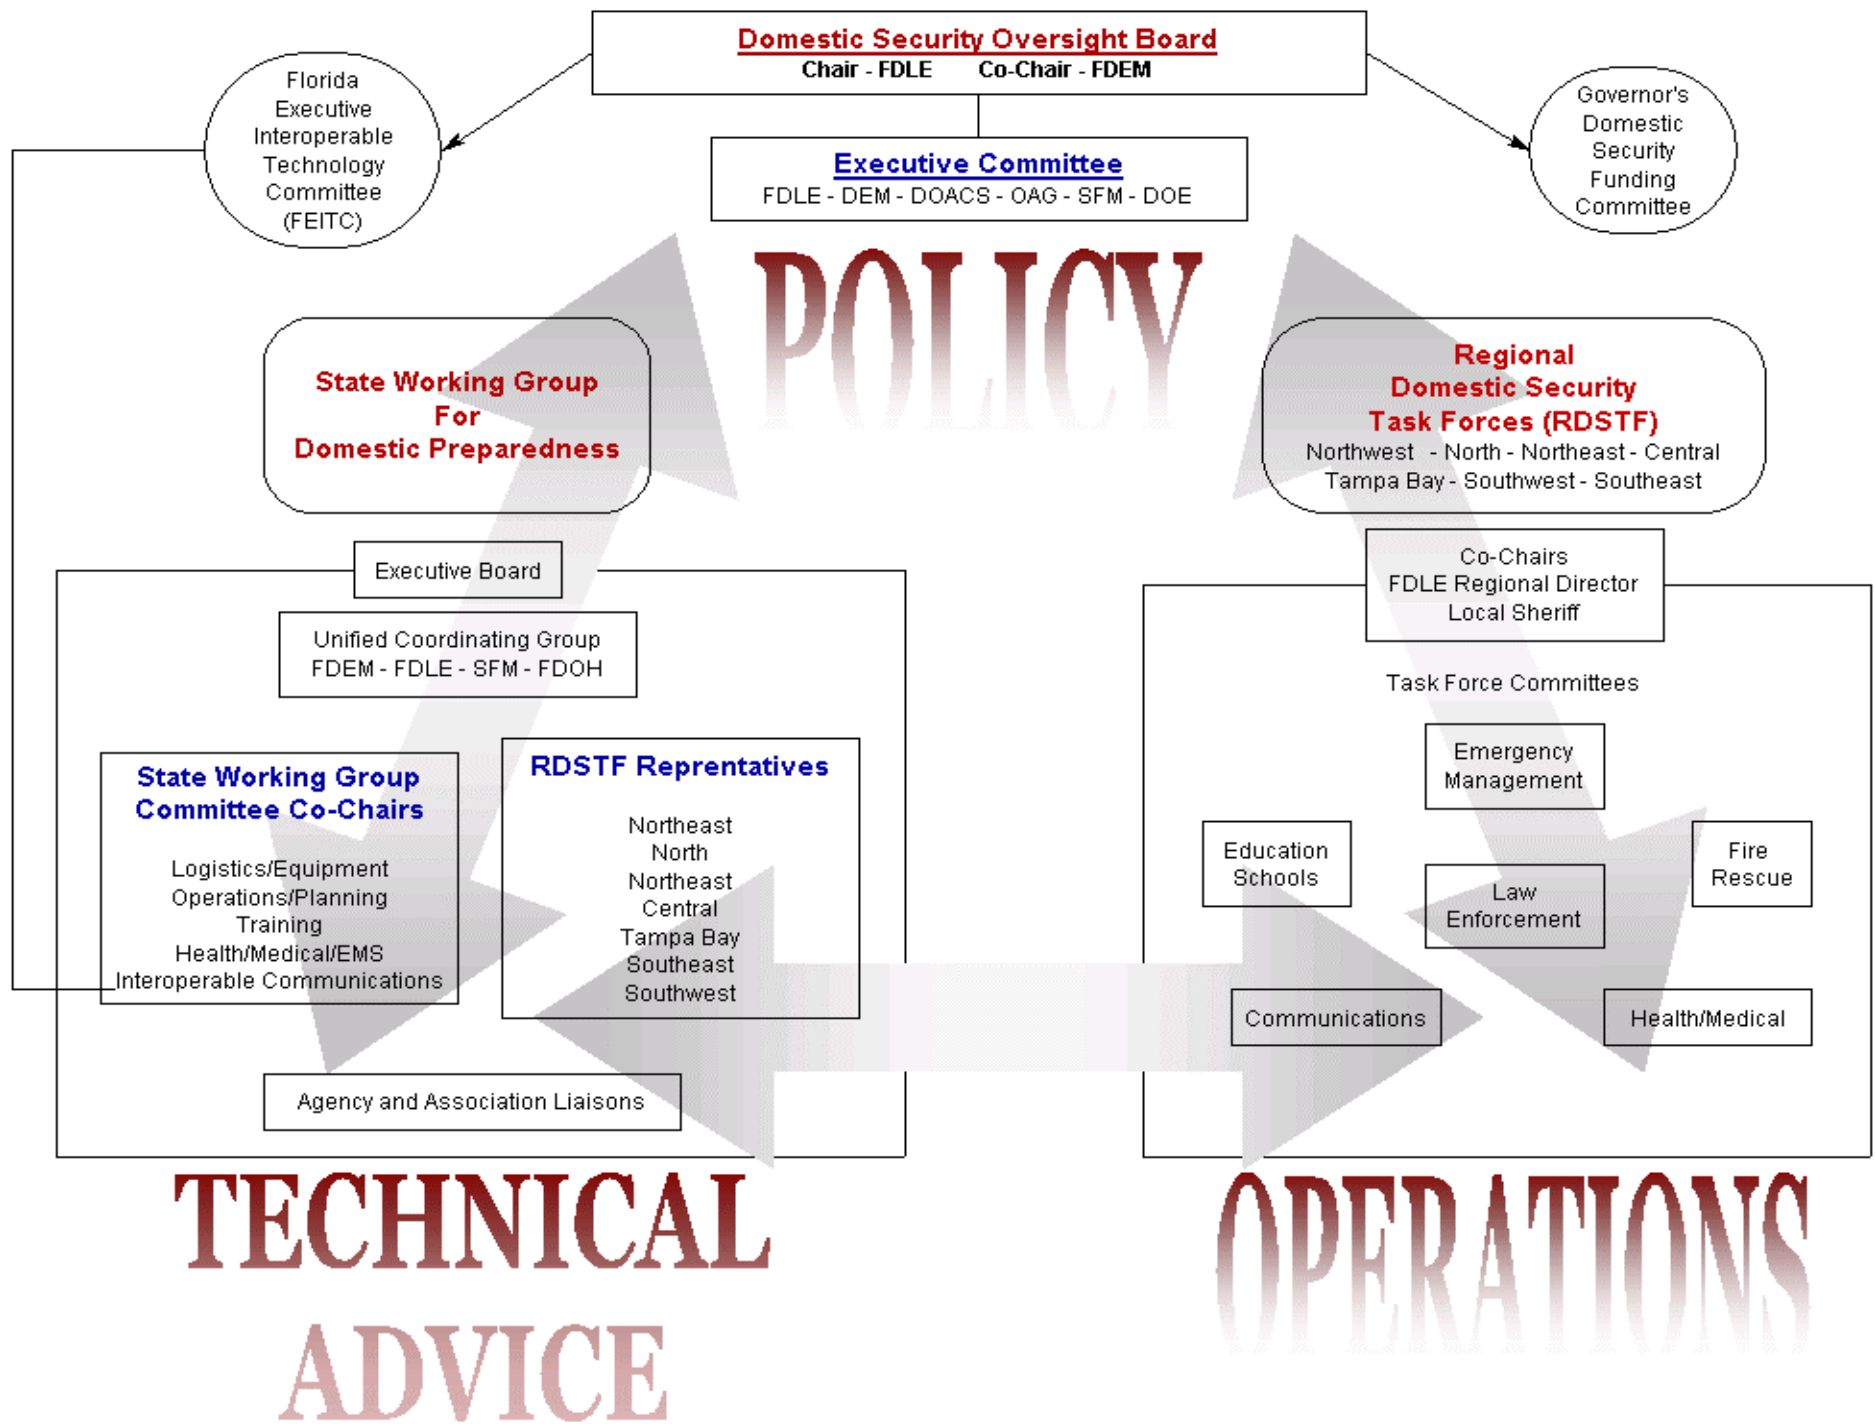

- **RECOVER** quickly and restore our way of life following a terrorist event

Emergency Management

**Domestic
Security**

**Public Health
Preparedness**

Hurricane Jeanne

Points of Distribution POD

MEDICAL RESERVE CORPS STAFFING OF PODS: A FINANCIAL ANALYSIS

Physicians	\$250/hr at clinic	ARNP/ PA	\$ 75/hr	Respiratory Therapists	\$ 40/hr
Dentist	\$200/hr	RN	\$ 35/hr	Pharmacists	\$ 50/hr
Chiropractors	\$ 9/hr	LPN	\$ 25/hr	Clinical Social Workers	\$ 50/hr
Optometrists	\$ 50/hr	Dental Hygt.	\$ 50/hr	Support Staff	\$ 17/hr

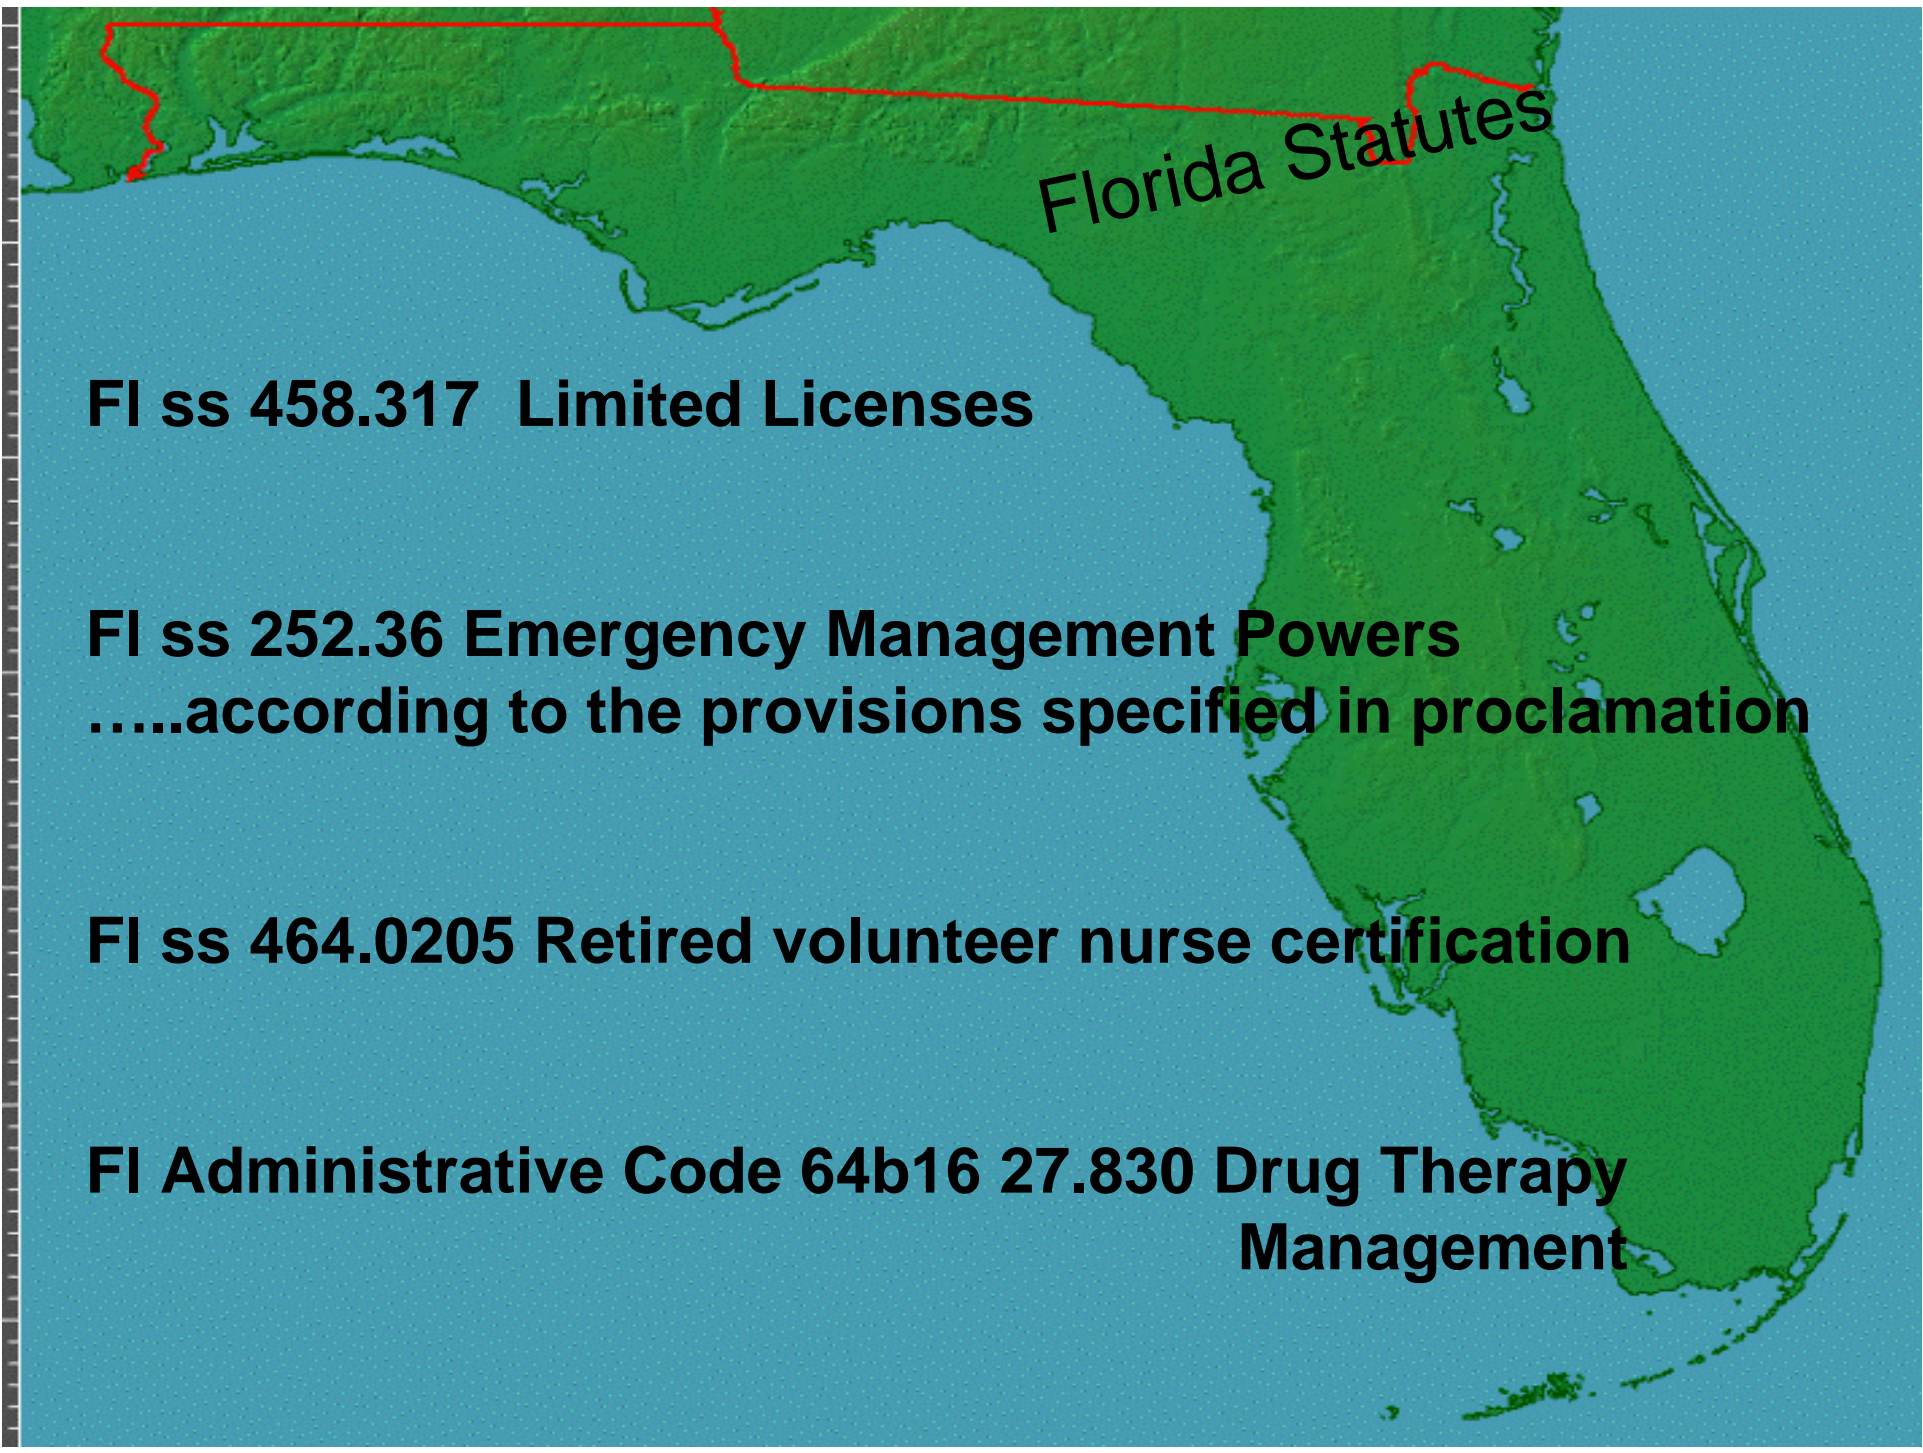

Collier County

- 288,000 people to treat
- 8 PODS available
- 36,000 people per POD in 36 hours
- 1000 people per hour per POD
- Average 25 immunizations per hour
- 40 immunizers can treat 1000 patients per hour per POD

Value

- the value of using 56 Medical Reserve Corps Volunteers in one POD for one twelve hour shift is **\$ 30,240**.
- In Collier County the Medical Reserve Corps could probably do two PODS for two shifts. That translates a **\$ 120,960** value to the State if an incident occurs.

Florida Statutes

MILLIONS FLEEING

Gov. Bush wants state declared disaster area

By JEFF KENNEDY and RAFA NELL
STAFF WRITERS

Thousands jammed airports and highways Thursday seeking to escape Hurricane Frances as the largest evacuation in Florida history got under way. More than 2.5 million people from Miami north to Flagler County were ordered by Gov. Jeb Bush to flee the coast and low-lying areas.

During a visit to the Brevard County Emergency Operations Center, Bush warned that the storm "is going to hit us. And it's going to hit us hard."

The governor asked his brother, President Bush, to declare the entire state a disaster area. It was the second such request in three weeks, since Charley ravageded Floridians to the bottom of hurricanes.

Theme parks will close early today, and Orlando International Airport will shut down at noon. Unable to enter guests' bookings, hotels were dealing with frantic tourists who had no way to get home.

MAGNITUDE

Frances could join Andrew in history books

By MARK NELL
STAFF WRITER

MIAMI — Nobody can say exactly when one of the largest, most powerful storms to threaten the state will come ashore, but it's likely Floridians will never see another Hurricane Frances.

Unfortunately, that's only because the name Frances will almost certainly be retired after this 2004 hurricane season.

Excessive in breadth and sluggish in speed, Frances could eclipse Charley, a powerful Category 4 storm that lashed Florida just three weeks ago from the other coast.

No matter where it strikes, Frances is going to be big, bad and ugly, a slow-moving behemoth of churning winds that could dump as much as 10 to 20 inches of rain, last

FLOODING

100-year rains may overwhelm drain systems

By MARY SHANKLIN and JOE NEWMAN
STAFF WRITERS

Hurricane Frances is about to give Central Florida the kind of drenching that occurs around only once every 100 years or so, a deluge that will likely produce widespread flooding in the region.

Local officials say there is no way to prepare for the amount of rain — 10 to 20 inches in about a day — that parts of the region could receive this weekend. Even the newest, best-designed stormwater systems aren't ready, they say. And even if they were, debris from Hurricane Charley has clogged many drainage ditches.

The result: Neighborhoods that have never seen flooded streets could find themselves under water by Saturday evening as the massive storm moves slowly through the re-
